What is Compass Cancer Care?

Compass Cancer Care uses a multidisciplinary team approach to support you and your loved ones throughout the cancer journey. Your personal cancer care team will work in partnership with you to address the variety of needs associated with a cancer diagnosis. These include the physical components as well as the emotional, social and practical factors, which ultimately impact treatment outcomes and quality of life. The goal of Compass Cancer Care is to ensure you and your loved ones receive the genuine support and guidance you deserve.
What To Expect

Compass Cancer Care is designed to meet a variety of your needs from the time of diagnosis, into treatment and beyond. We encourage you to have your closest loved one or caregiver with you as they are a vital source of support.

At your first appointment, you will complete a questionnaire which will provide us with an understanding of your unique needs and concerns. You will then meet with members from our multidisciplinary team who will provide specialized oncology support services to address the variety of factors associated with cancer treatment and recovery.

This patient-centered approach will allow your cancer care team to provide the most individualized and effective care for you and your loved ones. We will work closely with your physicians to communicate and achieve your personalized goals of care.

The needs of you and your loved one may change across the continuum of care. Regardless of where you are along this journey, our team is dedicated to ensuring constant support. We will continually assess your needs and offer the necessary services essential to helping you adapt to life after cancer.

Integrated Care Services

Nurse Navigation
You will have a personal nurse navigator who will be your single point of contact for questions and concerns while serving as a vital link between you and your healthcare team.

Specialized Nutritional Care
A registered dietitian will offer you the support and education regarding the nutritional needs you may encounter at any phase of your treatment and recovery.

Palliative Care
Palliative care focuses on managing pain, symptoms and treatment related side effects. Research has shown that initiating palliative care early on improves quality of life and enhances treatment outcomes.

Mind–Body Wellness
The emotional, practical, social, and spiritual impact of a cancer diagnosis is our primary concern. Our holistic comprehensive approach to all areas of your life ensures that we treat you as a person first and the cancer last.

Rehabilitative Care
Our highly trained rehabilitation specialists provide proactive assessments and individualized treatment to address the various physical and cognitive impacts associated with surgery, chemotherapy and radiation therapy. Our goal is to improve quality of life while maximizing treatment recovery.
