MISSION STATEMENT

WE ACHIEVE EXCELLENCE BY PROVIDING SUPERIOR PATIENT CARE BASED ON CUSTOMER SATISFACTION AND TIMELY SERVICE, BY TEACHING THE NEXT GENERATION OF DOCTORS, AND BY SEEKING NEW DISCOVERIES INTO THE COURSE AND CAUSES OF DISEASE.

CORPORATE HISTORY

The University Centers of Excellence physicians are faculty physicians of the University of California, San Francisco (UCSF) at UCSF Fresno, through Central California Faculty Medical Group (CCFMG). The UCSF Fresno Medical Education Program was established in 1975 as a clinical branch of UCSF. The program was created with support from the California Legislature and the Veterans Administration to address the severe shortage of physicians practicing in the Central Valley. CCFMG was incorporated in 1979.

On an annual basis, UCSF Fresno trains approximately 250 medical residents in nine specialties and 50 medical fellows in 17 sub-specialties. CCFMG physicians are faculty for eight of the residency programs and all of the fellowship programs, listed on page 5.

The University Centers of Excellence offices were developed to allow the community to have access to UCSF faculty physicians without having to travel to San Francisco. We are very fortunate to be able to offer UCSF faculty to the residents of the Central Valley and to help fill the need for physicians. Not only do citizens gain access to UCSF Faculty physicians, they also gain access to a greater number of physicians since approximately fifty percent of the physicians that train in our program remain in the Central Valley to practice medicine.

Growing Valley doctors is at the heart of UCSF Fresno. Since its inception, the program has graduated more than 2,000 resident physicians. CCFMG has over 20 University Centers of Excellence offices offering over 50 different specialties and sub-specialties, making the Central Valley a stronger and healthier community.
RESIDENCY PROGRAMS
- Emergency Medicine
- Family and Community Medicine
- Internal Medicine

Office Manager: Teresa Jensen

University Dermatology Associates provides comprehensive care in the diagnosis and treatment of skin, hair and nails.

GENERAL DERMATOLOGY
- Common skin disorders such as acne, eczema, rosacea, and warts
- Psoriasis: including topicals, systemic medications, and phototherapy
- All rashes or skin growths of unknown cause
- All forms of skin cancers and pre-cancers, including surveillance exams for new cancers

ADOLESCENT/PEDIATRIC DERMATOLOGY (Newborn to 18 years old)

PHOTOTHERAPY
- Full body Narrow Band Ultraviolet B (NBUVB) and Psoralen Ultraviolet A (PUVA) light therapy for psoriasis, eczema and other conditions
- UVA hand/foot unit for psoriasis and eczema involving the palms and soles

PHOTODYNAMIC THERAPY
- Treatment that combines a photosensitizing topical medication with a specific wavelength of light to remove pre-cancerous and cancerous skin cells
- Used to treat actinic keratoses, superficial basal cell carcinoma, superficial squamous cell cancer, lentigines, photoaging, fine rhytides, acne, and more

COSMETIC DERMATOLOGY Botox, dermal fillers (e.g. Juvederm, Restylane), chemical peels and other cosmetic services

SERVICES
- General Dermatology
- Adolescent/Pediatric Dermatology
- Phototherapy
- Photodynamic Therapy
- Cosmetic Dermatology
- Dermatologic Surgery
- Mohs Micrographic Surgery

DERMATOLOGIC SURGERY We provide high-quality, in-office same-day surgical procedures to remove skin cancers without the associated cost of a hospital or surgical center. We also provide chemical surgery, cryosurgery (liquid nitrogen) and electrosurgery.

Mohs MICROGRAPHIC SURGERY We are one of only a few sites in the Central Valley to provide Mohs surgery by a Mohs fellowship trained dermatologist. Mohs surgery involves removing skin cancers on areas of the body (ears, nose, near eyes) where it is especially desirable to preserve as much normal skin tissue as possible. The Mohs surgeon acts as both surgeon and pathologist at the microscope, taking care to confirm all skin cancer is removed before the skin is surgically repaired—all on the same day. This procedure has been shown to limit recurrent skin cancers and preserves as much normal anatomy and skin as possible. Clinical studies have shown that Mohs surgery provides five-year cure rates approaching 99% for new cancers and 95% for recurrent cancers.

University Diabetes and Endocrine Specialists

7085 N. Chestnut Ave., Suite 101
Fresno, CA 93720
559.323.9236 • 559.323.0294 fax
Office Manager: Tajinder Matharu

University Diabetes and Endocrine Specialists was founded in 2004 by Dr. Sujatha Srikanth who is board-certified in Endocrinology. This specialty practice became a University Center of Excellence in January of 2017. All providers and the care team are highly skilled and knowledgeable in treating disorders of the endocrine system.

We provide care in the following areas:

- Endocrine
- Diabetes Management
- Weight Management
- Thyroid Treatment
- Osteoporosis
- Nutritional Counseling

Ultrasounds and Bone Density (DEXA) screenings are conducted on site by our qualified CRT and RDMS technician. Fine Needle Biopsies are also performed on site by our qualified physicians.

Since we have an affiliation with UCSF, all our physicians are faculty who treat patients, conduct research and teach the next generation of specialists. Approximately 40% of all physicians remain and practice medicine in the area once they have completed their residency training. This is a significant resource in our community as we are bringing the expertise of UCSF to Fresno, and creating more qualified physicians for the Central Valley.

Medical Nutrition Therapy and Medical Weight Management

We offer medical weight management, nutritional counseling, and educational classes as a part of our comprehensive program to treat diabetes and obesity related diseases. Our RDN (Registered Dietitian Nutritionist) and CDE (Certified Diabetes Educator) works closely with patients to manage their weight and blood glucose levels through proper nutrition and change in lifestyle. Our RDN has over 20 years of experience in nutrition counseling.

University Centers of Excellence – Hepatology Clinic

Mission
1. To provide the highest level of care for patients with liver disease
2. To teach future generations of physicians
3. To educate our community about the importance of liver health
4. To further the understanding of liver diseases through clinical research
5. To advocate and promote liver health

Areas of Expertise:
1. Hepatitis C diagnosis and management, including use of the newest advances in hepatitis C therapies.
2. Complete Hepatitis B care including cancer screening and assistance in management of hepatitis B in pregnancy and post-partum.
3. Cirrhosis evaluation and management: ascites, hepatic encephalopathy, non-invasive management of esophageal varices, referral for transplant evaluation and pre-transplant care.
4. Liver tumor evaluation
5. Autoimmune liver disease diagnosis and management including Autoimmune Hepatitis (AIH), Primary Biliary Cholangitis/Cirrhosis (PBC) and Primary Sclerosing Cholangitis (PSC).
6. Non-Alcoholic Fatty Liver Disease (NAFLD leading to NASH)
7. Alcohol induced liver disease.
8. Drug (prescription, dietary supplements) induced liver injury
9. Evaluation of abnormal liver function tests including arrangements for appropriate imaging modalities, serological testing, FibroScan and liver biopsy.

Additional Recourses:
1. American Liver Foundation: general information on liver diseases and liver health
   www.liverfoundation.org
2. CDC viral hepatitis for the public: information on viral hepatitis A, B, C, D, E
   www.cdc.gov/hepatitis

Hillblom Center on Aging
A University Center of Excellence

2335 E. Kashian Lane, Suite 301 • Fresno, CA 93701
559.443.2684 • 559.264.9199 fax

Office Manager: Mayra Nieves

When an older adult is coping with challenges resulting from physical, mental or emotional changes, the Hillblom Center on Aging at UCSF Fresno can help identify the most appropriate solutions. By providing specialized geriatric assessment, the Geriatric Assessment Program benefits seniors over 65 years old with multiple/complex problems requiring multi-dimensional assessment. They may be at risk for institutionalization, decreased independence and deterioration to higher levels of care. These problems are of a medical, functional, psychosocial nature and may include: multiple diseases, multiple symptom complexes, incontinence, confusion, falls/immobility, polypharmacy, unexpected response to illness, unexplained loss of functional ability, weight loss of unknown cause, multiple visit to Emergency Department and/or multiple hospital admissions, escalating care needs and/or a decline in independence.

Walter A. Forred, M.D.
Director,
Hillblom Center on Aging,
UCSF Fresno

University Medicine Associates

2335 E. Kashian Lane, Suite 280 • Fresno, CA 93701
559.320.1090 • 559.320.0331 fax

University Medicine Associates is one of the most comprehensive multi-specialty centers in the Central Valley. The office encompasses five specialties that are uniquely offered at one location.

ENDOCRINOLOGY: The Department of Endocrinology provides consultative, diagnostic and therapeutic services for the full range of endocrine problems. Our doctors specialize in the management of bone diseases, thyroid disorders, diabetes, pituitary disorders, adrenal disorders, and disorders of male and female hormones.

INFECTIOUS DISEASE: The mission of the Department of Infectious Diseases and Pathology is to acquire, advance, and disseminate knowledge in the fields of parasitology, pathology, microbiology, immunology, epidemiology, and other disciplines that will help identify, control and prevent animal disease and/or contribute to public health.

INTERNAL MEDICINE: Internists are equipped to deal with whatever problem a patient brings — no matter how common or rare, or how simple or complex. They are specially trained to solve puzzling diagnostic problems and can handle severe chronic illnesses and situations where several different illnesses may strike at the same time. They also bring to patients an understanding of wellness (disease prevention and the promotion of health), women’s health, substance abuse, mental health, as well as effective treatment of common problems of the eyes, ears, skin, nervous system and reproductive organs.

OCCUPATIONAL & ENVIRONMENTAL MEDICINE: The Department of Environmental and Occupational Medicine focuses on preventing environmental and occupational health related disease and promoting health through our education, research and professional and community service.

RHEUMATOLOGY: Our physicians actively diagnose and treat diseases associated with pain and/or inflammation in the muscles, joints or fibrous tissues including, but not limited to, various types of arthritis, back pain, soft tissue disorders, connective tissue diseases and osteoporosis.

University Neurology Associates and Community Regional’s Neuroscience Outpatient Rehabilitation Center are together in the same office.

The office contains dedicated, comprehensive diagnostic and treatment facilities. It is the first of its kind in the region providing a team of experienced and dedicated physicians, allied health care providers and staff to care for patients at one location. This brings a multidisciplinary approach to the field of neuroscience, ensuring that patients with various neurological diseases and injuries to the spine, nervous system and brain receive the most appropriate course of care in an efficient manner.

University Neurosciences Institute Mission Statement

The mission of University Neurosciences Institute (UNI) is to provide outstanding care to patients with neurological and spinal disorders. Our team of neurosurgeons and neurointensivists are fellowship-trained in their respective subspecialties and are dedicated to improving patients’ neurological and overall states of health. Our physicians make innovative and valuable contributions through meticulous clinical practice and performing meaningful research. We teach young physicians and nurse practitioners the art and science of treating neurological and spinal disorders. We build partnerships with colleagues in our immediate and extended communities to improve the health and quality of lives in the Central Valley.

We provide the latest advances in technology coupled with a warm, friendly atmosphere to give you the optimal patient experience. We care for women with honesty and compassion.

University Obstetrics and Gynecology Center is committed to providing personalized care that is sensitive to the unique needs of women. We offer comprehensive, patient-centered care that spans throughout a women’s lifespan. In addition to preventative well woman visits we specialize in family planning, preconception, pregnancy and post-partum care, adolescent care, menopause management, abnormal bleeding, and offer prevention, screening, and treatment of gynecologic diseases and gynecologic cancer. We emphasize the importance of education so that you can be engaged and actively participate in your health care.

Our team of experienced physicians treat you with respect while maintaining the highest levels of professionalism. Over the years we have become one of the most trusted sources for Obstetrics & Gynecological care in the Central Valley.

We truly appreciate each patient. If you have questions, please feel free to contact us any time and one of our friendly staff members will be happy to assist you!

CLOVIS: 729 N. Medical Center Drive West, Suite 111 • Clovis, CA 93611
559.320.0531 • 559.320.0539 fax

Office Manager: Daniel Rodriguez

University Orthopaedic Associates specializes in the diagnosis and treatment of musculoskeletal conditions. Our group consists of 9 orthopaedic surgeons, all having completed a subspecialty fellowship. Our group specializes in Orthopaedic Trauma, Hand Surgery, Pediatric Orthopaedics and Joint Replacement.

The majority of musculoskeletal problems can be treated without surgery. In the cases where surgery is necessary, our orthopaedic surgeons are knowledgeable in the latest techniques which offer our patients the best outcomes.

Our surgeons specialize in:
- Fractures of the upper and lower extremities and pelvis
- Acute and chronic injuries; unhealed or slowly healing fractures
- Simple and complex fractures and dislocations of joints
- Sports injuries; Tendon, Ligament, Meniscal, Labral tears
- Hand Injuries; Fractures, chronic conditions and soft tissue injuries
- Knee, hip, shoulder replacements and revisions

We are currently comprised of Cardiology, Endocrinology, Gastroenterology, Genetics, Neurology and Pulmonology. Pediatric specialists specializing in:

**CARDIOLOGY DISEASES**
- Adult Congenital Heart Disease
- Congenital Heart Disease
- Heart Murmur
- Palpitations
- Arrhythmia or Abnormal EKG
- Chest Pain
- Acquired Heart Disease

**GASTROENTEROLOGY DISEASES**
- Inflammatory Bowel Disease
- Liver Transplant, Home TPN
- Bowel Rehabilitation
- Medical Nutrition
- Short Gut Rehabilitation
- Total Parenteral Nutrition
- Specialized GI Procedures
- Celiac Disease

**NEUROLOGICAL DISEASES**
- Neurological Disorders
- Neurodevelopmental Disorders
- Epilepsy
- Muscle Disorders
- Headaches
- Movement Disorders
- Developmental Delays

**ENDOCRINOLOGY DISEASES**
- Diabetes Mellitus Type 1 and 2
- Hypothyroidism
- Hyperthyroidism
- Short Stature
- Disorders of Puberty
- Hypercalcemia
- Hypocalcemia
- Congenital Adrenal Hyperplasia

**GENETIC DISEASES**
- Autism Spectrum Disorders
- Intellectual Disabilities
- Dysmorphic Features
- Genetic Syndromes

**PULMONARY DISEASES**
- Asthma
- Chronic Cough
- Cystic Fibrosis
- Chronic Lung Disease of Prematurity
- Pulmonary Function Testing
- Pulmonary Hypertension

We are a unique pediatric office since we have an affiliation with UCSF. All our physicians are faculty physicians with UCSF and they treat patients, conduct research and teach the next generation of Pediatricians and Pediatric Specialists. Approximately 40% of all physicians remain and practice medicine in the area where they went through their residency training. This is wonderful for our community. Not only are we bringing the expertise of UCSF to Fresno, we are also creating more pediatricians for the smallest members of our community.

University Perinatal Associates – Clovis

726 Medical Center Drive East, Suite 223, Clovis, CA 93611
559.320.0555 • 559.320.0558 fax

Office Manager: Connie Pendleton

University Perinatal Associates offers a full spectrum of high risk pregnancy services and works collaboratively with patients and care providers to provide superior, compassionate, and personalized High Risk Obstetrical care.

We are committed to delivering individualized patient and family focused care with clinical competency and excellence in the field of high risk obstetrical care.

Our team is comprised of experienced and highly qualified perinatalogists, genetic counsellors, mid-level providers, and sonographers who strive to maintain high quality, evidence based perinatal care. We not only provide the diagnosis but also a detailed understanding of the various medical conditions complicating pregnancies in a patient friendly language. This allows us to build a true partnership with our patients and referring providers to develop a multi-disciplinary treatment plan specifically tailored to each patient’s needs.

For more information or to schedule an appointment, give us a call.

University Physical Therapy is dedicated to providing our patients with the highest level of care. We utilize the latest equipment and cutting-edge techniques to return our patients to their normal daily lives in a cost-effective, efficient manner. Our patient-centered approach allows us to deliver hands-on, personalized care from start to finish.

We’re not your typical physical therapy location. Our physical therapist is trained in the latest innovative techniques and work closely with physicians across the region to develop specialized programs for the treatment of a wide variety of conditions and diagnoses. Our goal is to work together to develop a plan of care that is aimed at getting you back to your normal daily activities.

At University Physical Therapy, we travel the road to recovery with you! We truly appreciate each patient and understand that, in the end, you just want to feel better.

University Sleep and Pulmonary Associates specializes in sleep and pulmonary disorders. First established in 1988, we have been providing exceptional healthcare for those who require these unique forms of care. Our staff is highly qualified with board certified physicians and highly trained specialists to provide comprehensive specialized care.

Our office provides polysomnography (sleep studies), overseen by board certified sleep specialists. We continue to provide comprehensive pulmonary services for the Central Valley, also overseen by board certified pulmonary specialists. It is a referral center for areas from throughout the San Joaquin Valley. Our office is the only sleep center in the area that has earned the American Academy of Sleep Medicine (AASM) Accreditation.

NOTES
University Surgical Associates

7415 N. Cedar Avenue, Suite 102 • Fresno, CA 93720
559.435.6600 • 559.435.6622 fax

University Surgical Associates consists of a group of physicians specializing in surgical procedures. We maintain a patient centered approach to delivering safe, effective and timely surgical care.

While we offer a wide range of surgical services, our areas of specialty focus are:

**ENDOCRINE SURGERY**: a surgical procedure performed to achieve a hormonal or anti-hormonal effect in the body. This includes surgery on the thyroid, either for masses or abnormal function, surgery for parathyroid disorders, surgery for the adrenal gland and surgery for the pancreas. — Christina Maser, M.D.

**GENERAL SURGERY**: a surgical specialty that focuses on abdominal organs - e.g. intestines, stomach, colon, liver, gallbladder, bile ducts and hernias. This also includes cancer surgery. — Christopher Kinter, M.D., & Christina Maser, M.D.

**HIGH RISK**: screening for patients at high risk for developing breast cancer.

**LAPAROSCOPIC SURGERY**: also referred to as minimally invasive surgery, is a technique in which small incisions are made and the surgeon performs the operation using a camera and special instruments. — Christopher Kinter, M.D.

**VASCULAR ACCESS SURGERY**: vascular access is a passageway to the bloodstream created by a minor surgery to be used for dialysis treatment. High quality access will allow the full benefit of dialysis. There are two types of permanent vascular access, AVF (Arterial Venous Fistula: A fistula is made by joining an artery to a vein) and AVG (Arterial Venous Graft: A graft uses an implanted tube to connect the artery to the vein). — Christopher Kinter, M.D.

**VASCULAR SURGERY**: a surgical specialty that is concerned with diseases of the vascular system, arteries and veins. A vascular surgeon diagnoses and manages diseases affecting all areas of the vascular system excluding the heart and brain. — Christopher Kinter, M.D.

**WOUND CARE**: a variety of procedures that ensure the healing of wounds. Procedures performed in the office include: Autologous Skin Grafting (A-Cell), Negative Pressure Wound Therapy, Debridement — Surgical and Chemical, Compression Therapy (Unna Boot)/Farrow Wrap and Custom Fit Compression Stockings. — Christopher Kinter, M.D. & Charlotte McFall, NP

**PROGRAMS**

**PANCREATIC CANCER SUPPORT GROUP**
*University Surgical Associates*
Fourth Wednesday at 5 PM.

**WOUND CARE SERVICES**

Upon completion of his medical degree Dr. Agrawal completed an OB/GYN Residency program at the State University of New York, Downstate Medical Center. After completing residency training, Dr. Agrawal completed his fellowship at University of Louisville in Pelvic Medicine and Reconstructive Surgery (Urogynecology). He is now on the academic faculty at UCSF Fresno.

- Taught the International Laparoscopic Cadaver Course sponsored by AAGL
- Gave national and international presentations at AAGL, AUGS, IUGA, and SGS
- Specializes in all forms of surgery including: vaginal, laparoscopic, robotic, and open surgery

Medical Interests
- Robotic Surgery
- Minimally Invasive Surgery
- Fecal Incontinence
- Urinary Incontinence
- Pelvic Organ Prolapse
- Vaginal Reconstruction
- Vaginal Rejuvenation
- Non-Mesh Surgery
- Interstim (Pacemaker for the bladder)
Valley Podiatry and Diabetic Foot Center

6215 North Fresno Street Suite 108 · Fresno, CA 93710
559.256.9600 · 559.489.0498 fax

Office Manager: Nicole Pizarro

Valley Podiatry and Diabetic Foot Center is concentrated on the acute and chronic management of the diabetic lower limb. Highly focused on the inpatient surgical management of the acutely infected diabetic foot and the outpatient management of the acute and chronic diabetic lower limb wound(s) (ulcerations). Utilization of the Wagner, University of Texas, and Venous Forum classification schema for wound staging. Implementation of screening and stratification models for the at risk diabetic foot. State of the art, office-based wound care facility with utilization of allograft implantation and offloading modalities, as well as multi-layer compressive bandaging systems for the venous leg.

AREAS OF FOCUS:

- Surgical Management of Diabetic Foot Infections
- Osteomyelitis
- Digital Amputations
- Ray Resections
- Transmetatarsal Amputations
- Chopart’s Amputations
- Tendon Transfers / Lengthening(S)
- Charcot Neuroarthropathy
- Diabetic Foot Ulcerations
- Venous Leg Ulcerations
- Bioengineered Skin Substitutes
- Allograft Implantation
- Diabetic Foot Offloading Modalities
- Multi Layer Compressive Bandaging Systems

Office Manager: Connie Pendleton

University Women’s Specialty Center is a comprehensive women’s medical practice that specializes in Maternal-Fetal Medicine, Prenatal Diagnostics and Diabetes in Pregnancy. As one of the most advanced facilities in the area, University Women’s Specialty Center offers treatment services for the region’s high-risk pregnancy cases.

SERVICES

- Vaginal Ultrasounds
- Cervical Length
- Level 1 (Dating & Growth)
- Level 2 (High Resolution Anatomy)
- 3-D & 4-D Ultrasounds
- Fetal Echocardiography
- Doppler Assessment of Fetal Vessels
- Preconceptual Counselling
- Antepartum Testing, AFI, BPP On-Site
- Prenatal Diagnosis and Genetics
- Medical Complications of Pregnancy
- Fetal Complications & Anomalies
- RH Disease, Isoimmunization
- Diabetes In Pregnancy
- Amniocentesis
- High Risk Obstetrical Care and Fetal Diagnostics

University Women’s Specialty Center is located in an area with the highest neonatal standard mortality ratio in the state, according to 2003 statistics from the Maternal-Child Health Branch of the California Department of Health. This statistic will change with our offices providing greater access to comprehensive healthcare for high-risk pregnancies.

The key to effective treatment of high-risk pregnancy cases is to have the necessary services and technology at one central location.
