## Due to the Covid-19 pandemic, we are currently urging our patients to use our Telehealth virtual services.

### How does it work?

- We can connect you with your physician via video visit through an easy to use app that can be downloaded on your smartphone, PC or tablet.

### If on the phone with patient:

- We will walk you through the easy step-by-step instructions now, or if you feel that you may need assistance with downloading and setting up the app, I can transfer you to our staff standing by to happily assist you.

### What are some benefits?

- By using this Telehealth service, you can stay home while still being seen by your doctor.
- During this time when it's important to limit social contact, we strongly encourage all patients to participate in telehealth appointments.
